HOT-COVID newsletter – December 2021

Dear friends and colleagues

Status

The number of hospitalised patients with COVID-19 has increased dramatically during November. This has been reflected in a large increase in the number of randomisations from most of the participating sites. We would like to sincerely commend all sites and all involved personnel for your efforts in screening and randomising patients into the trial during these trying times. It is highly appreciated.

Cardiff in Wales and Reykjavik in Iceland have shown interest in joining the trial and the first steps have been taken.

Recruitment

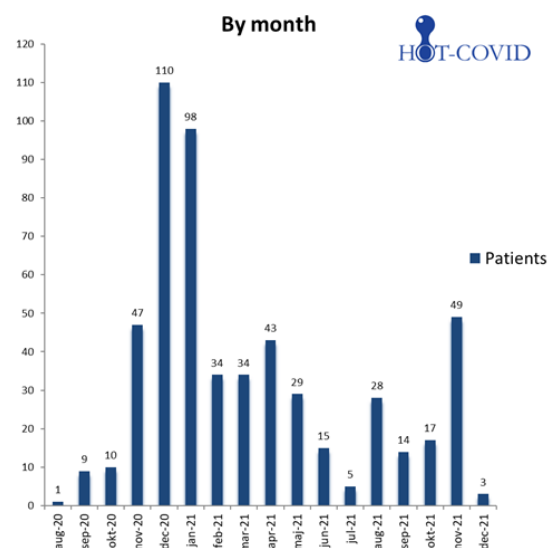

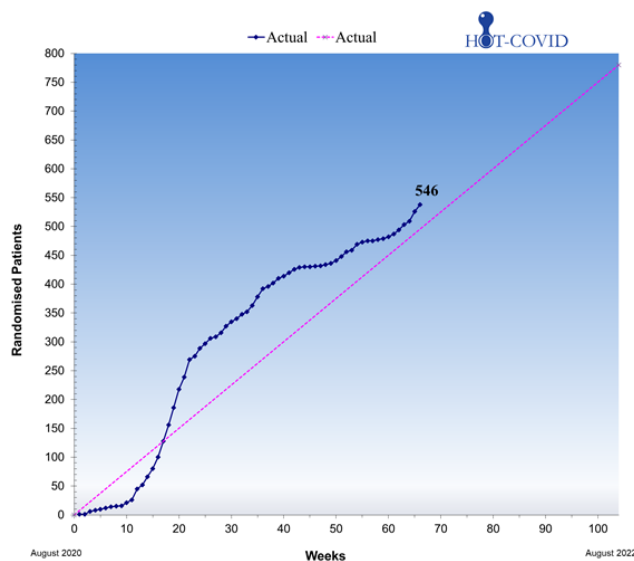

Currently 550 patients have been randomised into the trial. Impressive rates are seen across all sites.

In this aspect, we would like to acknowledge **Køge ICU** for randomising **patient nr 500 on the 4th of November!**

Cake is at stake again for randomisation nr 600.

Randomisation nr 500!
