

## Place in Site Master File #13

### CLASSIC newsletter – December 2018

Dear friends in CLASSIC

**THANK YOU** for your commitment in the very early start of the trial!

#### Status

The first patient was randomised at the ICU at Rigshospitalet, Denmark on November 27<sup>th</sup> 2018. We have randomised 7 patients since then, and we plan to run the trial at Rigshospitalet a full month to gain experience before initiating other sites. You can follow the inclusion and find all other relevant trial documents at [www.cric.nu/CLASSIC](http://www.cric.nu/CLASSIC)

#### Future active sites

We are looking much forward to welcome more Danish trial sites from January 2019. ICUs at **Bispebjerg, Køge, Roskilde, Randers** and **Viborg** hospitals will be among the first to recruit patients in the beginning of next year.

The first international sites to join will be **Sweden, Norway, Switzerland, Czech, Spain** and **Finland**.
